Zavoda za eksperimentalnu fiziku IRB-a i Fizičkog odsjeka PMF-a)

# Relativistic and nonrelativistic dynamics of the Snyder model

**Salvatore Mignemi**

Dipartimento di Matematica, Universita' di Cagliari

Datum: četvrtak, 06. lipnja 2013.

Vrijeme: **11 sati c.t.**

Mjesto: seminar Zavoda za teorijsku fiziku, IRB

### **Abstract:**

The Snyder model is an example of noncommutative spacetime admitting a fundamental length scale and invariant under Lorentz transformations, that can be interpreted as a realization of the doubly special relativity axioms. We review the classical and quantum one-particle nonrelativistic dynamics on this background and discuss its relativistic generalization.
